- (54) Title:** CONSISTENT USER INTERFACE FRONT END FOR REMOTE USER INTERFACES

(57) Abstract: A method and device for providing a single consistent user interface based on replacing disparate user interface constructs (components) with equivalent constructs (components) from a “synonym” database of user interface constructs (components). The database is initiated with a set of foundational “synonym” constructs (components) and extended with user interface constructs (components) as they are discovered during reduction of an inconsistent user interface to a consistent state.
